EXPERIENCE

AMIGO PARTNERSHIP - Lead Front-End Developer

Since March 2020

Remotely lead the front-end team of 4 to deliver high end websites and apps for a range of clients, mainly using React, Next.js and Angular 8 with Capacitor. Most of our projects had to integrate with headless Content Management Systems including CraftCMS and wordpress API. Since my arrival, I have implemented a more collaborative working environment, using Pull Requests and code reviews. Now all our new projects, depending on client requests, will use Next.js with Typescript and TailwindCSS
