JAKE KNOWLES

FRONT END DEVELOPER

Experience

Amigo Partnership

Lead Front-End Developer
Since March 2020
Remotely lead the front-end team of 4 to deliver high end websites and apps for a range of clients, mainly using React, Next.js and Angular 8 with Capacitor. Most of our projects had to integrate with headless Content Management Systems including CraftCMS and wordpress API. Since my arrival, I have implemented a more collaborative working environment, using Pull Requests and code reviews. Now all our new projects, depending on client requests, will use Next.js with .Typescript and TailwindCSS
